

I respectfully request that the FCC consider the needs and desires of the public over those of the NAB. AM and FM radio stations are 24 hour commercials offering very little of what you tune in to listen to and they offer none of what satellite radio offers. It seems to me that if I pay for these services, what concern is it to the NAB. And, to be frank, I listen to AM/FM and satellite radio and probably will continue to do so.

Sincerely,
